

Product Reference Manual

SKU: AKX00066

Description

Arduino® Alvik is a powerful and versatile differential robot car specifically designed for programming and STEAM education.

Powered by Arduino® Nano ESP32, Alvik offers diverse learning paths through different programming languages including MicroPython, Arduino C, and block-based coding; enabling different possibilities to explore Robotics, IoT and AI.

Target areas:

Maker, Education, MicroPython, Robotics

1 Features

1.1 General Specifications Overview

Alvik is an education robot which is battery-powered and comes with two main microcontrollers:

- At the core of the robot there is the STM32 Arm® Cortex®-M4 that controls all the sensors and actuators
- At the top a Nano ESP32 acts like the main controller and can communicate with the STM32 through a set of dedicated APIs

Alvik's Main Components

Feature	Description
Alvik on-board Core	STM32 Arm® Cortex®-M4 32 Bit
Alvik Main Controller	Arduino® Nano ESP32
Connectivity	Wi-Fi®, Bluetooth® LE
Sensors	RGB Color detection, ToF 8x8 Array - up to 350 cm, IMU - 6 degree, 3x Line follower, 7x Touch sensor
Motors	High precision with hall effect encoder, Up to 13 cm/s
Extensions	Servo motor, I2C Grove, Qwiic, Lego® Technic, M3 Screws

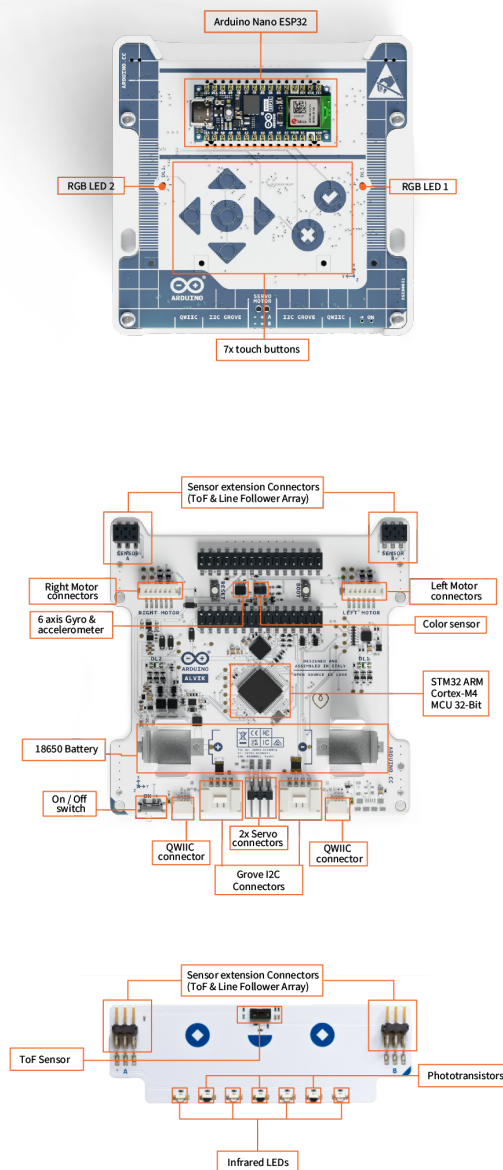

1.2 Communication Interfaces

maybe not worth it

1.3 Related Accessories (Included)

- USB-A Cable to USB-C®

2 Technical Specifications

Main components of the robot from top, bottom and front perspective

2.1 MCUs

MCU	Product page	Datasheet
STM32F411RC	link	link
Arduino® Nano ESP32	link	link

2.2 Inputs

Description	Part Name	Product page	Datasheet
Color detection	APDS 9660	link	link
IMU	LSM6DSOX	link	link
Time of Flight	VL53L7CXV0GC	link	link
Capacitive Touch Controller	AT42QT2120	link	link
Line Follower Arrays	Custom made		

Attached to the Capacitive Touch Controller there are seven capacitive buttons on the top of the main board and in addition there is a line follower array made up by three phototransistor and five infrared LEDs.

The three phototransistor are linked directly to the analog ports of the STM32.

2.3 Outputs

Description	Info
RGB LED Left	3 channel LED
RGB LED Right	3 channel LED
Motor Left	High precision motors with magnetic encoder
Motor Right	High precision motors with magnetic encoder

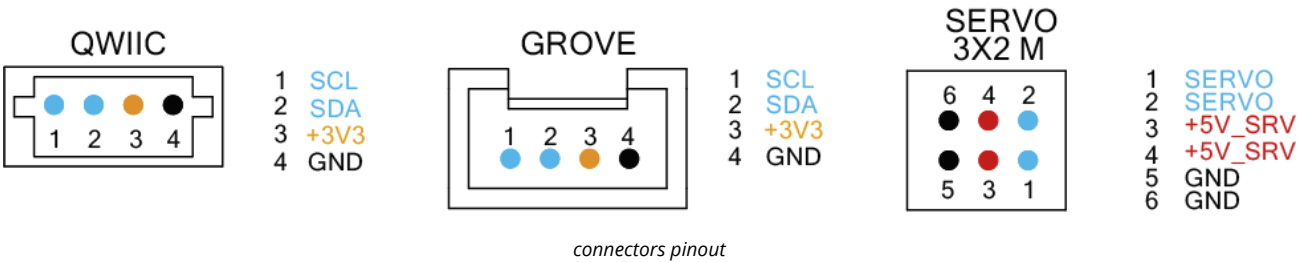

The datasheet of the motors is here

The two motors are driven by the MAX22211 motors driver:

Description	Part Name	Product page	Datasheet
Dual Motor Driver	MAX22211	link	link

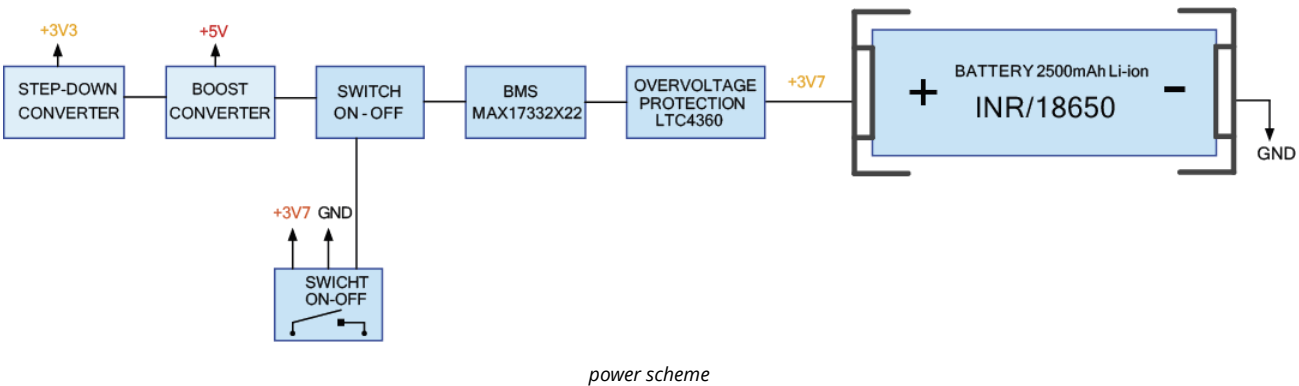

2.4 Connectors

The connectors are placed in the back of the robot, the pinout is shown in the following image:

2.5 Power

The power distribution in the robot is explained by the following diagram:

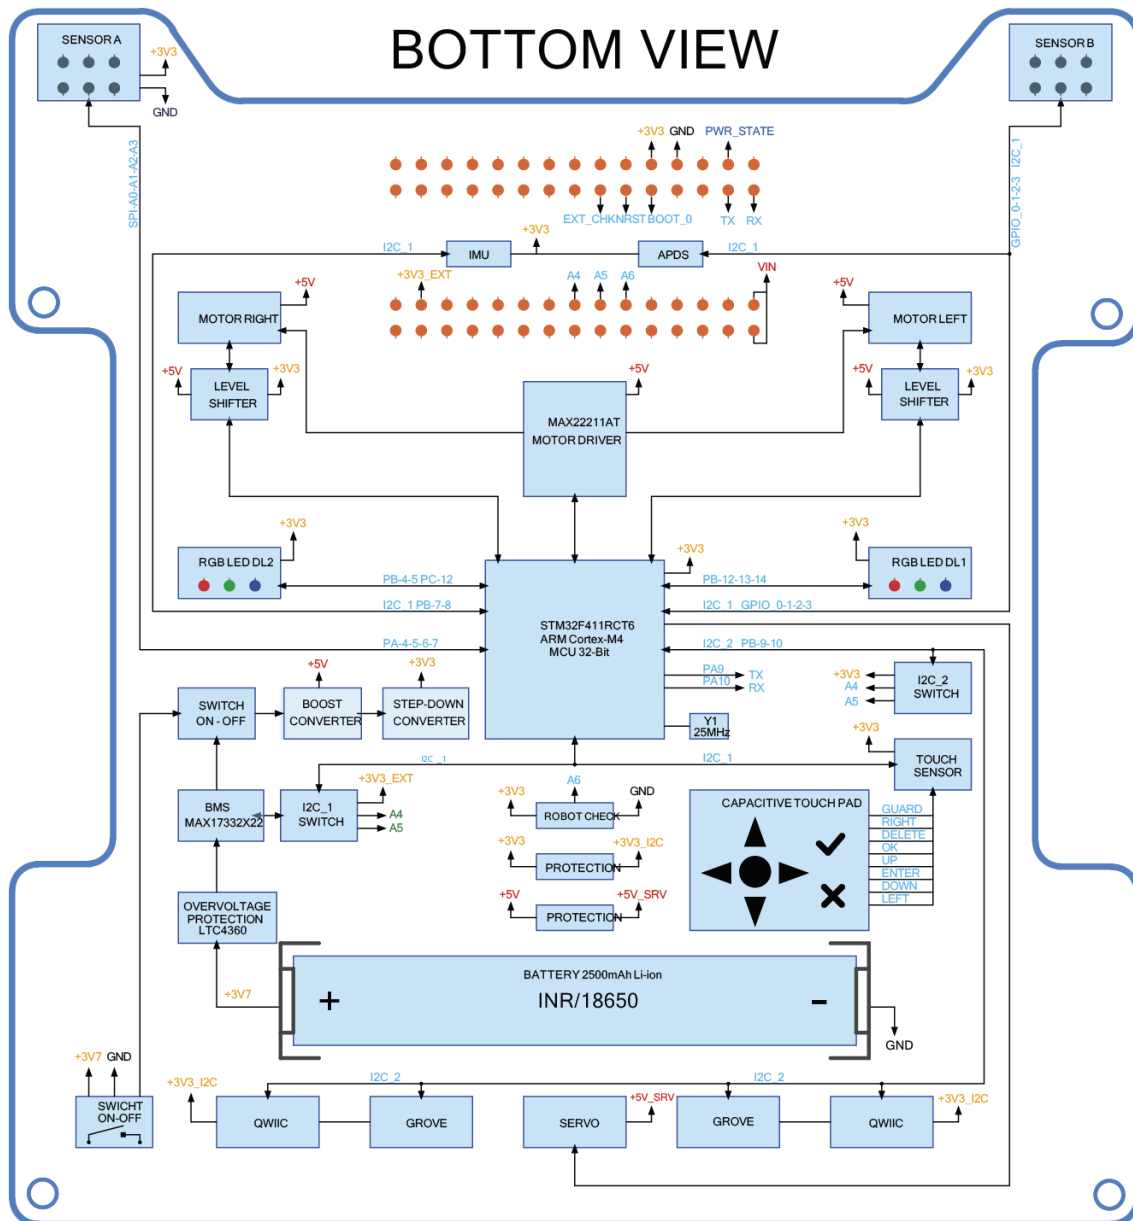

There are three level of power:

Level	Description
+3V7	From the battery, the reference level is 3.7 V but it can goes from 3.0 V to 4.2 V
+5V	After the Boost Converter
+3V3	After the Step Down Converter

3 Functional Overview

block diagram

4 Mechanical Information

parts

Part	q.ty
Main PCB	1
Front PCB	1
Arduino Nano ESP32	1
INOX M3 x 5 mm	5
18650 Li-Ion Battery	1
Main Chassis	1
Ball caster holder	1

Part	q.ty
Inox stell ball 9 mm	1
Motor holder	2
Motors	2
Rubber wheel	2
2x6 mm screw	2
Battery panel	1

5 Certifications

5.1 Declaration of Conformity CE DoC (EU)

We declare under our sole responsibility that the products above are in conformity with the essential requirements of the following EU Directives and therefore qualify for free movement within markets comprising the European Union (EU) and European Economic Area (EEA).

5.2 Declaration of Conformity to EU RoHS & REACH 211 01/19/2021

Arduino boards are in compliance with RoHS 2 Directive 2011/65/EU of the European Parliament and RoHS 3 Directive 2015/863/EU of the Council of 4 June 2015 on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

Substance	Maximum Limit (ppm)
Lead (Pb)	1000
Cadmium (Cd)	100
Mercury (Hg)	1000
Hexavalent Chromium (Cr6+)	1000
Poly Brominated Biphenyls (PBB)	1000
Poly Brominated Diphenyl ethers (PBDE)	1000
Bis(2-Ethylhexyl} phthalate (DEHP)	1000
Benzyl butyl phthalate (BBP)	1000
Dibutyl phthalate (DBP)	1000
Diisobutyl phthalate (DIBP)	1000

Exemptions : No exemptions are claimed.

Arduino Boards are fully compliant with the related requirements of European Union Regulation (EC) 1907 /2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH). We declare none of the SVHCs (<https://echa.europa.eu/web/guest/candidate-list-table>), the Candidate List of Substances of Very High Concern for authorization currently released by ECHA, is present in all products (and also package) in quantities totaling in a concentration equal or above 0.1%. To the best of our knowledge, we also declare that our products do not contain any of the substances listed on the "Authorization List" (Annex XIV of the REACH regulations) and Substances of Very High Concern (SVHC) in any significant amounts as specified by the Annex XVII of Candidate list published by ECHA (European Chemical Agency) 1907 /2006/EC.

5.3 Conflict Minerals Declaration

As a global supplier of electronic and electrical components, Arduino is aware of our obligations with regards to laws and regulations regarding Conflict Minerals, specifically the Dodd-Frank Wall Street Reform and Consumer Protection Act, Section 1502. Arduino does not directly source or process conflict minerals such as Tin, Tantalum, Tungsten, or Gold. Conflict minerals are contained in our products in the form of solder, or as a component in metal alloys. As part of our reasonable due diligence Arduino has contacted component suppliers within our supply chain to verify their continued compliance with the regulations. Based on the information received thus far we declare that our products contain Conflict Minerals sourced from conflict-free areas.

5.4 FCC Caution

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference
- (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC RF Radiation Exposure Statement:

1. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
2. This equipment complies with RF radiation exposure limits set forth for an uncontrolled environment.
3. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator & your body.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

English: User manuals for licence-exempt radio apparatus shall contain the following or equivalent notice in a conspicuous location in the user manual or alternatively on the device or both. This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

- (1) this device may not cause interference
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.

French: Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

(1) l'appareil n' doit pas produire de brouillage

(2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

IC SAR Warning:

English This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.

French: Lors de l' installation et de l' exploitation de ce dispositif, la distance entre le radiateur et le corps est d' au moins 20 cm.

Important: The operating temperature of the EUT can't exceed 85°C and shouldn't be lower than -40 °C.

Hereby, Arduino S.r.l. declares that this product is in compliance with essential requirements and other relevant provisions of Directive 201453/EU. This product is allowed to be used in all EU member states.
